Mobile App Development
Tutorial Assignment

Develop two types of Java Android apps with the augmented reality ARCore SDK. Please follow the instructions presented in the doc "Google ARCore Software Development Kit for Android Apps." Groups of up to five students can be created to develop these apps.

In the first app, please display a 3D model. Please feel free to choose a 3D model. Two examples are as follows:

In the second app, please use three different shapes of different colors. Please feel free to choose the shapes and colors. Examples are as follows:
